

BC Public Service Net

Calling the British Columbia Public Service Net. Good evening. Net Control tonight is _____. My name is _____ and I am located in _____.

This net meets daily at 01:30 UTC on 3729 kHz as a public service. This is a directed net. All stations are welcome. Please check in when your area is called. CW stations are asked to offset downwards 700 Hz to give us a clear tone on LSB. Please do not interrupt the net except for an emergency, to contact a recent check-in, or to correct an error.

To save time, please use standard phonetics. Before beginning regular net activities...

1. Are there any liaison stations from the BCEN, Northern Net, EMBC or BCYTN?
2. Are there any relay stations on frequency?
3. Are there any check-ins from mobile or portable stations only?
4. Are there any RAC bulletins?
5. Are there any announcements this evening?
6. Are there any stations with health & welfare bulletins or reports of Silent Keys?

Roll call this evening will begin with the _____. First I will take check-ins from those wishing to make a station-to-station call.

(begin the net)

This concludes the BC Public Service Net for this evening. My thanks to stations that supplied relays and to those giving us a clear operating frequency. Please tune in tomorrow evening at 01:30 UTC when _____ will be your net control station. The net is now closed at _____ hours. Thank you and 73. This is _____ out.
